WORK EXPERIENCE

Lighting Designer
Full-time
Regent Lighting Asia, K-lite Industries
India

With 5 years of experience as a Lighting Designer in the Indian lighting industry, I have successfully delivered innovative and effective lighting solutions for diverse projects, including offices, hospitals, infrastructure, and sports stadiums. My skills encompass expertise in 3D software such as Dialux Evo, Dialux 4.13, Relux, Autocad 2D and Photoshop, enabling me to deliver top-notch visualizations and designs. Notably, I have had the privilege of working with esteemed clients such as Bank of America, Facebook, LinkedIn, Dell, and Microsoft, consistently demonstrating my ability to work collaboratively under pressure and deliver high-quality results within tight deadlines, showcasing my expertise and commitment to excellence in lighting design.

PROJECTS

You Tube Video Streaming Website
- Developed a comprehensive YouTube project leveraging the YouTube API, integrating its robust features with searching and playback capabilities while ensuring scalability and performance.
- Effectively utilized React Router to navigate between various pages and components within my application.

Trello Board
Designed a task management website, Trello Board, to track task progress, featuring:
- Backlog: Task assignment
- In Progress: Task status update via checkbox
- Done: Task completion confirmation
With delete and edit capabilities.

SKILLS

- HTML 5
- CSS 3
- JavaScript
- React.js
- React Query
- REST APIs
- Material-UI
- Typescript
- Git
- GitHub
- Web Applications
- Basic Photoshop

Soft Skills
- Active listening
- Adaptability
- Attention to detail
- Continuous learning
- Decision-making
- Experimenting with new tools and technologies
- Problem-solving
- Result Driven
- Teamwork
- Time management
- Work ethic

EDUCATION

B-Tech - Bachelor of Technology in Electronics and Communications Engineering
Greater Noida Institute Of Technology, India
01/2013 - 12/2017

IDC Bank

- Leveraged the robust and widely-used Material-UI (MUI) library for designing a banking application, incorporating its pre-built customizable components, which enhances development efficiency and reducing design and implementation time.

Job Posting Portal

- Developed a job posting portal that leverages the robust Hacker News API to aggregate and showcase an array of job listings to explore and apply for exciting opportunities in the tech industry.

Glitz and Glam

- Created an e-commerce website that boasts a user-friendly interface, seamless navigation, and robust online shopping capabilities, providing customers with a hassle-free and engaging digital shopping experience.
