Summary

Proficient in JavaScript, React, TypeScript etc while integrating RESTful APIs and leveraging modern UI libraries like Material UI with a strong foundation in building responsive and visually appealing web applications. Passionate about learning new technologies and eager to contribute to innovative development projects.

Skills

Languages : JavaScript, TypeScript, HTML5, CSS3, Python, C++

Frameworks/Libraries : React, Vite, React Router, Material UI, NPM, React Query, Bootstrap, Redux, Recharts, Node.js, Playwright, Jest, React Testing Library, CRA, Playwright

Version Control : Git, GitHub, Bitbucket

Operating System : Windows, Linux

Developer Tools : Visual Studio Code, IntelliJ IDEA, Eclipse, Jira, Postman, Confluence

Technologies : Rest APIs, Context API, Cross-Browser compatibility, Webpack, Agile development, DSA Object-Oriented Design, SDLC, Zoho API, Firebase

Soft Skills: Attention to detail, Decision-making, Result driven, Team work, Work ethic, Continuous learning

Experience

Voulay | Web Development Intern

03/2025 - Present

Skills - React, JavaScript, Rest API, Zoho API, Firebase, GitHub

- Developed a mobile-first React app to enhance customer engagement.
- Collaborated with team members to integrate REST and Zoho APIs for dynamic data and functionality.
- Implemented Firebase services (authentication, data storage) as part of a team development effort.
- Collaborated on project requirements and delivered tested code.
- Participated in team meetings and code reviews to ensure optimized application performance and quality.

K-Lite Industries | Lighting Designer

09/2021 - 09/2022

Skills - Dialux Evo, AutoCAD, Photoshop

- Designed and 3D rendered simulation for outdoor lighting like streets, sport stadiums, tunnels and building's facade.
- Provided lighting solutions for industries, warehouses and parking lots.
- Meetings with specifiers and describing product's specifications based on the client's requirements and design follow ups with them.

Regent Lighting Asia | Engineer- Lighting Application

07/2018 - 11/2020

Skills - Dialux 2.1, Relux, AutoCAD

- Prepared design and 3D rendering simulation where design inputs received from specifiers.
- Provided lighting solutions for renowned commercial, residential and hospitality projects like Bank of America, LinkedIn, Intel, Microsoft, Dell, Westin etc.

- Meetings with specifiers regarding complications at site while installation of fixtures and co-ordination with other technical departments to deliver best solution to customers better than competitors.
 - Travelling and site visits for intricate projects.
-

Projects

You Tube Video Streaming Website

- Developed a YouTube inspired **React** based project using **CRA** leveraging the **YouTube Rest API**, integrated with **React design patterns** such as **component composition**, **state management** (via hooks like **useState** and **useEffect**), and **props** with searching and playback features.
- Effectively utilized **React Router** to navigate between various pages and components within my application.

Trello Board

- Designed a task management website, Trello Board with the help of **React + Vite** utilizing **reusable components, hooks and props** to track task progress.
- Features pie chart using the **Recharts library** making the progress easy to read.
- Easy to filter priorities of low, medium and high tasks.

E-commerce

- Built an e-commerce website using **HTML, CSS and JavaScript**,
 - Integrated **media queries** to ensure a **responsive design** across various devices.
 - Utilized modern and efficient **ES6 features** which creates a visually appealing and user-friendly interface.
-

Education

Greater Noida Institute Of Technology | Noida, India

Electronics and Communications Engineering

07/2013 - 04/2017

- Developed a news portal website "Hacker News" using Hacker News API. The site displays 6 news headlines at a time with a "Load More" button to fetch and show the next 6 headlines. This process continues until all news items are displayed and then "Load More" button disappears.
- Made an air pollution detector device using a combination of electronic components, including a relay, printed circuit board, capacitor and other essential devices. It monitors air quality by detecting pollutants and triggering alerts through the relay mechanism. The PCB ensures efficient connectivity while the capacitor stabilizes the electrical system.
